Back Yard Design: Assessment, Consulting, Clean-up, Design and Upgrade Suggestions, Quoting, Organization and Installation of suggested Landscape Upgrade during Summer 2003 following the Upgrade of Front and Side Yard.

Low maintenance solution for natural look, incorporating 'desert' atmosphere requested by owners to remind them of their trips to Moab, as well as colours, perennials, grasses and existing native plants of Whistler.

The more formal side yard is defined by the existing round beds, paving stones and fence. Some elements are continued into the backyard to connect both and allow for a natural flow. The round beds are reflected in the round lawn shape and similar perennials continue in the back garden beds.

Interesting design elements like the pattern of the stepping stones and waves that continue three dimensionally in the gravel 'desert' and soil areas give the garden a more unique character, and extend the design into the a third dimension that can be experienced both from the main deck above as well as from ground level.
